Why InCore?

InCore is the only outsourcing specialist for small and medium-sized private banks.

Founded originally as a **spin-off from a private bank**, we understand our clients' requirements and communicate with them as equals.

We see ourselves **in partnership** with our clients – bankers talking to bankers.

As a **pure transaction bank**, without private clients of our own, our focus is exclusively on providing our client banks with the best service.

About us

InCore is a pure **transaction bank** (with a FINMA license but no private clients of its own).

We have **over a decade's experience** in outsourcing of systems and bank processes in private banking.

With 16 financial institutions, we (SOBACO/InCore) now form the largest **private banking outsourcing community operating on Finnova Banking Software**.

Our competence center is your sole contact and contracting partner for all your needs.

As part of the SOBACO Group we are a **one-stop shop** and offer you comprehensive, complementary solutions.

Our offering

Modular, flexible outsourcing offering ranking from basic to full-service outsourcing.

- **BPO (Business Process Outsourcing)**

Securities, payment transactions, tax reporting, etc.

- **Street side services**

Global custody, global execution and global correspondent services

- **Compliance services**

Compliance community

- **SaaS (Software as a Service)**

Comprehensive multi-tenant banking platform with many specialist solutions for specific requirements

Your benefits

By outsourcing your business processes you can focus on your core business and strategic projects. We free up time and resources for your business to invest in innovative projects.

- **Reduce complexity**

With our standardized processes and platform we deliver efficient and value-for-money solutions for you.

- **Cost optimization**

You benefit from economies of scale (trading, settlement and technology) and high cost transparency.

- **Agility**

As we are the central contracting partner for your bank, you enjoy short, personal communication and decision-making channels.
